

Ph.D. positions at the University of Perugia – Italy

Ph.D. positions in **Statistics** are available within the Ph.D. of Economics offered by the Department of Economics of the University of Perugia. **Two positions are reserved to students who already have a master degree obtained in a non-Italian University.** All activities will be run mainly in English. Knowledge of the Italian language is therefore not required. We kindly invite you to disseminate this information among your students looking for a doctoral education.

The Statistics group of the Department of Economics of the University of Perugia is very active. Research topics include:

- Multivariate, graphical and latent variable models
- Survey sampling and Small Area Estimation
- Causal inference

After a first year of courses with the aim of providing a specific training in mathematical and statistical methods for socio-economic research, students may choose the research theme that will form the main topic of their research. Students are expected to spend at least 6 months visiting a foreign University during their second year.

Full information is available at <http://dottorato.ec.unipg.it/> <<http://dottorato.ec.unipg.it/>>

The call for the Ph.D. positions and scholarships will be published on the last week of June 2018 at the link:

<http://www.unipg.it/en/courses/phd-program> <<http://www.unipg.it/en/courses/phd-program>>

The scholarship amount is € 15.638,47 per year, for three years. Furthermore, the scholarship may be increased by up to 50% for periods spent at universities outside of Italy. For the second and third year, a budget of € 1.563,84 p/year is also available for research and mobility activities.

For preliminary information on the required documentation to apply for the reserved scholarship, pls send an email to

ufficio.dottorati@unipg.it <<mailto:ufficio.dottorati@unipg.it>>

For further information contact me directly at the email below.

Best regards,

M. Giovanna Ranalli
